

Project Venus

Company Overview

- **Year of Establishment:** 2010
- **Locations:** Telangana and Andhra Pradesh
- **Core Business:** Specializes in the manufacturing and supply of Bulk Drug Intermediates, Fine Chemicals, Metal Reagents, Borane Reagents, and Grignard Reagents for both domestic and international markets.
- **Leadership:** Led by a team of industry veterans with over 25 years of experience in the Bulk Drug Industry.
- **Clientele:** Serves leading API and formulation companies across India and globally.
- **Certifications & Approvals:** Holds DCA and GMP DCA licenses, along with WHO GMP certification and internationally recognized standards, including ISO 9001:2015, ISO 14001:2015, and ISO 45001:2018.

Facility Overview

- **Total Land Area:** 6.2 acres (24,902 sq. meters)
- **Built-up Area:** 14,127 sq. meters

Production Capacity

- **Maximum Output:** 20,100 kg/day (weight-based production capacity)
- **Installed Capacity:** 166.3 KL (equipment and storage capacity)
- **Expansion Potential:** 90-100 KL of available space, allowing expansion up to 256.3 KL.

Products Overview

- APIs & Intermediates
- Bulk Drug Intermediates
- Fine Chemicals
- Metal Reagents
- Borane Reagents
- Grignard Reagents – Aromatic, Aliphatic and Turbo

Strategic Advancements

- Established a **new manufacturing unit** to focus on high-quality Active Pharmaceutical Ingredients (APIs) and their intermediates.
- Established **State-of-the-Art R&D Center** dedicated to new API development and contract research collaborations with leading global companies.

Team

- **Production:** 59, **R&D:** 30, **Quality Control:** 22, **Engineering:** 10
- **Others (Warehouse, QA, HR, Finance, and EHS):** 21
